設計師Ken Dunard試圖利用錐形在燈具上做些改變，以斜截頭的圓錐形創造出環繞和向上兩種光源，擁有不一樣的燈光效果，錐體可以小幅移動調整光線，而LED燈中心軸的部分附加了吸熱器。以藍色LED燈與白光結合，為空間營造出不一樣氣氛的光線，相當適合懸吊在具有現代或未來風格的餐廳或酒吧。

Designer Ken Dunard attempts to perform some variation on lamp design by utilizing cone shapes. He makes use of cone shapes cut off at the top at a slanted angle to create surrounding and upwards light sources. Cones can be moved to adjust lighting, while a heat sink attached to central axis of LED. Combination of blue and white LEDs create a unique atmosphere, suitable for restaurant or bar with a modern or futuristic theme.

FOX-chair
PARIS

仔細看，是不是發現這把造型椅很像某種動物？設計師Samal Dzmitry為了讓人們更關心生態保育，突發奇想以狐狸形狀為椅子做造型，讓椅子設計顯得更活潑生動，狐狸尾巴的部分巧妙地化為椅背，尤其在材質方面，還可選擇半透明材料，然後置入燈光，而這項有趣又獨特的設計，即將於米蘭設計展亮相。

Look closely, does this chair resemble some kind of animal? In order to make people care more about conservation of ecosystem, designer Samal Dzmitry ingeniously designed this lovely fox shaped chair, with tail of the fox as the back of the chair. One can even choose semi-transparent material and install lighting; this interesting and unique design will be unveiled at the Milan Design Fair.
